Where do you stand on your professional journey?

RGA's approach to underwriter training is based on our proprietary **Underwriting Core Competency Framework** that details the skills and knowledge expected at each stage of an underwriting career.

Our courses are **classified by experience level**, ranging from the individual starting their underwriting career to the established Chief Underwriter looking to stay on top of emerging trends. Topics at different experience levels cover **technical expertise, practical application**, and some **market knowledge**.

Learning Gateway courses are **flexible**. Work at your own pace and keep track of your progress. Repeat material as often as you like or skip chapters that you don't need. By arrangement, RGA can work with managers to **curate and track learning programs** for their teams, with associated reporting.

While primarily built with underwriters in mind, many life insurance professionals will find courses that will enhance their knowledge.

Learning Gateway offers instruction from RGA experts around the world in **multiple formats**, from interactive self-paced learning to short videos, case studies, and recorded webinars.

Those who successfully pass the knowledge test for a course can access a downloadable **completion certificate**. Completion of Learning Gateway courses meets the Continuing Professional Development requirement of many industry organizations, including:

- [The Academy of Life Underwriting \(ALU\)](#)
- [The Canadian Institute of Underwriters \(CIU\)](#)
- [The Association of Home Office Underwriters \(AHOU\)](#)
- [The Chartered Insurance Institute \(CII\)](#)
- [The Australasian Life Underwriting, Claims Association \(ALUCA\)](#)

Do you want to:

launch your career

Benefit from a series of foundational courses on risk management and underwriting topics for those new to the industry or new to underwriting. Courses incorporate multiple opportunities to explore, try, and practice.

build your knowledge

Develop knowledge and skills across a range of risk factors as you work towards your first underwriting authority. Each course includes realistic case studies to place new skills into context.

accelerate your career

Speed your career advancement with risk management and underwriting learning experiences designed for senior underwriters.

explore human anatomy and physiology

Our interactive job aids can help you learn the basics or provide a quick refresher on 20 different body systems. These job aids are also linked on the related impairment pages of RGA's Global Underwriting Manual.

spark meaningful discussions

Sometimes the best way to grow your career is to discover new ideas. Our series of brief videos by RGA experts around the world will ignite curiosity, insight, and conversations on a wide range of contemporary risk and medical topics.

practice your underwriting skills

Our interactive case studies are designed specifically for junior underwriters. Put your underwriting skills to the test on real applications that reflect a variety of risk factors and complexity levels.

review topics from multiple angles

RGA's Knowledge Center hosts hundreds of topical articles. With **review**, we take one of those articles, draw out the key underwriting considerations, and then offer additional media that views the same topic from additional perspectives. This series will help you stay on top of current trends.

watch to learn

Explore a library of exclusive in-depth webinars featuring the expertise of RGA underwriting and medical teams around the world.
